John Berlin D. Fuertes

Senior Full Stack Mobile Developer | Android & Kotlin Multiplatform

Valenzuela City, Philippines 1440 | johnberlinfuertes@gmail.com | +63 922 314 5483 | linkedin.com/in/john-berlin-fuertes

PROFESSIONAL SUMMARY

Senior Full Stack Mobile Developer with 9+ years of experience designing, developing, deploying, and maintaining mobile applications and libraries, primarily for the Android platform and backend microservices. Proficient in Android development, Jetpack Compose, Kotlin, and Kotlin Multiplatform, with a strong background in MVVM, MVP, MVI, and Clean Architecture. Experienced in leading developer teams, mentoring engineers on cross-platform library adoption, and implementing CI/CD pipelines to streamline development and deployment workflows. Skilled in leveraging AI-powered development tools such as GitHub Copilot and Claude to enhance productivity, accelerate development, and improve code quality. Passionate about advancing cross-platform app development using Kotlin Multiplatform and building versatile, scalable, high-quality software solutions.

WORK EXPERIENCE

Senior Android Developer — Cognizant

March 2025 – Present

- Maintain and develop new features and UI for the Android application
- Refactor and enhance legacy codebase to improve maintainability and performance

Senior Full Stack Mobile Developer — Ekahau

January 2021 – December 2024

- Led a team of 7 Android developers, mentoring them on contributing to a Kotlin Multiplatform library built from scratch
- Drove on-time delivery of releases across multiple apps, including Android Survey, Android Analyzer, and iOS Analyzer
- Refactored and optimized legacy logic in a core maintained app, reducing load time and eliminating UI lag
- Built the Ekahau Analytics library and integrated Firebase monitoring to track and reduce app crashes
- Created base classes and coding standards adopted across the Android codebase to enforce consistency
- Designed and maintained CI/CD pipelines via GitHub Workflows
- Evaluated and introduced alternative libraries to replace problematic APIs, improving stability

Senior Android Developer — WhiteCloak Technologies Inc.

April 2018 – January 2021

- Built Android applications from scratch, including Bayad Center, Valenzuela City, Sharea (ABS-CBN), Zing Ayala Malls, GetGo Pay, and PeraHub
- Contributed to development of the company's Android trainee onboarding course
- Contributed to company-wide Android code standardization efforts

Android Developer — OrangeHill Technologies

January 2017 – April 2018

- Built Android applications from scratch, including Crimson Boracay Room Control and Enguest (Guest/Staff) apps
- Designed real-time communication solutions integrating hotel automation systems via local and remote WebSocket servers

EDUCATION

Bachelor of Science in Electronics and Communication Engineering

University of the East, Caloocan, Philippines | 2007 – 2014

TECHNICAL SKILLS

Languages & Frameworks: Kotlin, Kotlin Coroutines, Kotlin Multiplatform, Java, Jetpack Compose, RxJava2

Architecture & Patterns: MVVM, MVP, MVI, Clean Architecture, App Architecture Design

Networking & Data: OkHttp, Ktor, Retrofit2, REST APIs, Firebase Integrations

CI/CD & Tooling: Bitrise CI/CD, GitHub Workflows, Fastlane, Git, Play Store Deployment, GitHub Copilot, Claude

Testing & Quality: Test-Driven Development, JUnit, Mockito, Espresso, Turbine, Mockk, Compose test, kotlintx-coroutine-test

Methodologies: Agile, Kanban, Waterfall

Platform: Android SDK
