# John Berlin D. Fuertes

Senior Mobile Developer | Android (Kotlin/Java), iOS & Kotlin Multiplatform

Valenzuela City, Philippines 1440 | johnberlinfuertes@gmail.com | +63 922 314 5483 | linkedin.com/in/john-berlin-fuertes

## PROFESSIONAL SUMMARY

Mobile Developer with 9+ years of experience designing, developing, and maintaining mobile applications, primarily for the Android platform using Kotlin and Java, with recent feature development and bug fixing on iOS and on the backend services that serve the mobile app. Experienced in translating UI designs into high-performing mobile applications with Jetpack Compose, integrating mobile apps with backend services and RESTful APIs, and adopting third-party libraries. Skilled in troubleshooting, debugging, and performance optimization of existing applications, including refactoring legacy code to reduce load time and eliminate UI lag. Hands-on with cross-platform development through Kotlin Multiplatform, CI/CD pipelines for mobile applications (GitHub Workflows, Bitrise, Fastlane), Git version control, and Agile development environments. Uses AI-powered development tools such as GitHub Copilot and Claude Code to accelerate delivery and improve code quality.

## WORK EXPERIENCE

### Senior Software Engineer — Cognizant

*March 2025 – Present*

- Maintain and develop new features and UI for the Android application
- Develop new features and fix bugs for the iOS application
- Fix bugs and add new features to the backend that serves the mobile app
- Refactor and enhance legacy codebase to improve maintainability and performance

### Senior Full Stack Mobile Developer — Ekahau

*January 2021 – December 2024*

- Drove on-time delivery of releases across multiple mobile apps, including Android Survey, Android Analyzer, and iOS Analyzer
- Refactored and optimized legacy logic in a core maintained app, reducing load time and eliminating UI lag
- Led a team of 7 Android developers, mentoring them on contributing to a cross-platform Kotlin Multiplatform library built from scratch
- Built the Ekahau Analytics library and integrated Firebase monitoring to track and reduce app crashes
- Evaluated and introduced alternative third-party libraries to replace problematic APIs, improving stability
- Designed and maintained CI/CD pipelines via GitHub Workflows
- Created base classes and coding standards adopted across the Android codebase to enforce consistency

### Senior Android Developer — WhiteCloak Technologies Inc.

*April 2018 – January 2021*

- Built Android applications from scratch, including Bayad Center, Valenzuela City, Sharea (ABS-CBN), Zing Ayala Malls, GetGo Pay, and PeraHub
- Contributed to company-wide Android code standardization efforts
- Contributed to development of the company's Android trainee onboarding course

### Android Developer — OrangeHill Technologies

*January 2017 – April 2018*

- Built Android applications from scratch, including Crimson Boracay Room Control and Enguest (Guest/Staff) apps
- Designed real-time communication solutions integrating hotel automation systems via local and remote WebSocket servers

## EDUCATION

**Bachelor of Science in Electronics and Communication Engineering**
University of the East, Caloocan, Philippines | 2007 – 2014

## TECHNICAL SKILLS

**Languages & Frameworks: Kotlin, Java, Kotlin Coroutines, Kotlin Multiplatform, Jetpack Compose, RxJava2**

**Platform: Android SDK**

**Networking & Data: REST APIs, Retrofit2, OkHttp, Ktor, Firebase Integrations**

**CI/CD & Tooling: Git, GitHub Workflows, Bitrise CI/CD, Fastlane, Play Store Deployment, GitHub Copilot, Claude Code**

**Methodologies: Agile, Kanban, Waterfall**

**Architecture & Patterns: MVVM, MVP, MVI, Clean Architecture, App Architecture Design**

**Testing & Quality: Test-Driven Development, JUnit, Mockito, Espresso, Turbine, Mockk, Compose test, kotlintx-coroutine-test**

**Backend Development (Familiar): Spring Boot, MongoDB, RESTful API Design**

**Backend Development (Beginner): PHP, Laravel, Herd**
